DR IMRAN KHATRI

Professor & Chairman

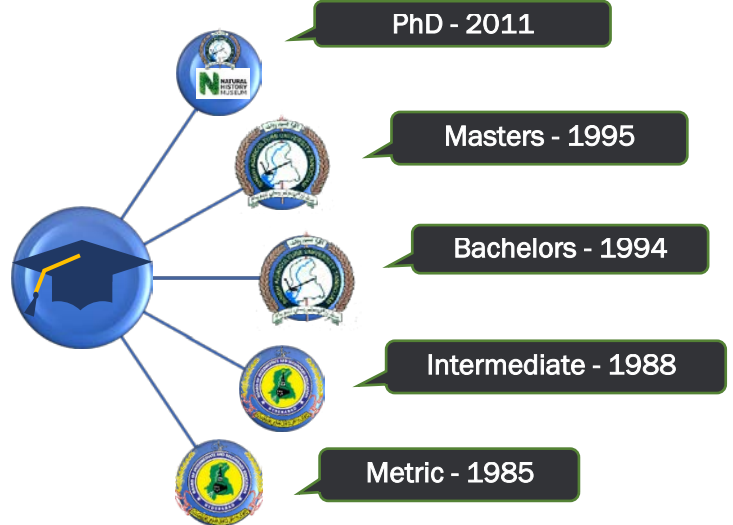

PROFILE

Dr. Imran Khatri is a highly accomplished Professor and Chairman of the Department of Entomology at Sindh Agriculture University Tandojam. He has over 20 years of teaching and research experience, and has made significant contributions to the field of Entomology in Pakistan. He has diverse research interests, including insect identification, nanomaterials training, and flytrap production. Dr. Khatri has discovered several new species of insects and has published 92 research papers, 4 books, and participated in several conferences. He has supervised 9 PhD students and 105 MSc students and has been actively involved in administration. Dr. Khatri is the founder of the Entomological Society of Sindh and is passionate about insect museums and identifying insect pests of crops. He received the Best University Teachers Award of HEC in 2022 for his accomplishments in the field of Entomology in Pakistan.

CITATIONS

His publications can be traced back to 2010 when he was pursuing his PhD. During his course identification, he made significant contributions in recognizing several new species, new country records, and new synonymies. Over time, his publications have appeared in reputable journals with high impact factors and other internationally recognized journals. Citations of his work reveal a consistent upward trend in his research output. Additionally, his ResearchGate account

INTERNATIONAL TRAININGS / CONFERENCES / ACADEMIC VISITS

Dr. Khatri has traveled to numerous countries for research, training, conferences, and academic visits. Notably, he was awarded the Best Paper Presentation in Tokyo, Japan in 2018. He also received training on nano materials from Shinshu University, Japan. During a six-month stint at the British Museum of Natural History in London, he conducted research on the Insect Fauna of the Indian Subcontinent in the Department of Entomology. He has also attended workshops in Brazil and China. Additionally, Dr. Khatri has undertaken academic visits to Kasaterat University in Thailand, ICBA in the UAE, and has established collaborations with Natural History Museums worldwide. In 2019, he

PROFESSIONAL MEMBERSHIPS

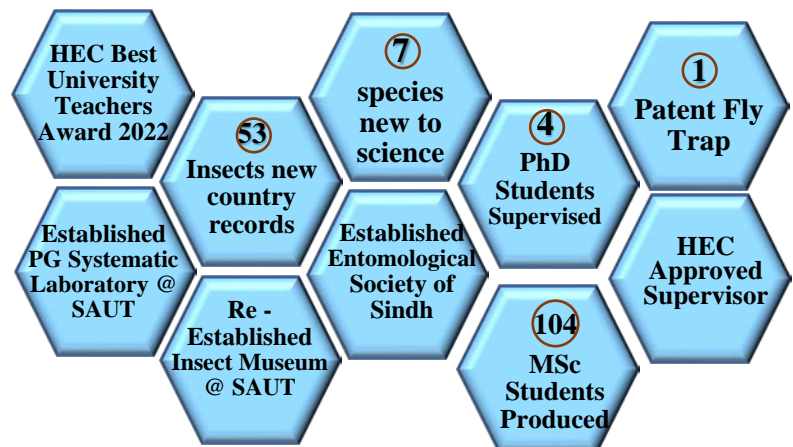

Dr. Khatri is an active member of various professional societies in his field, and he has also established the Entomological Society of Sindh with the aim of fostering connections among students, researchers, and alumni for the betterment of the

International Auchenorrhyncha Society

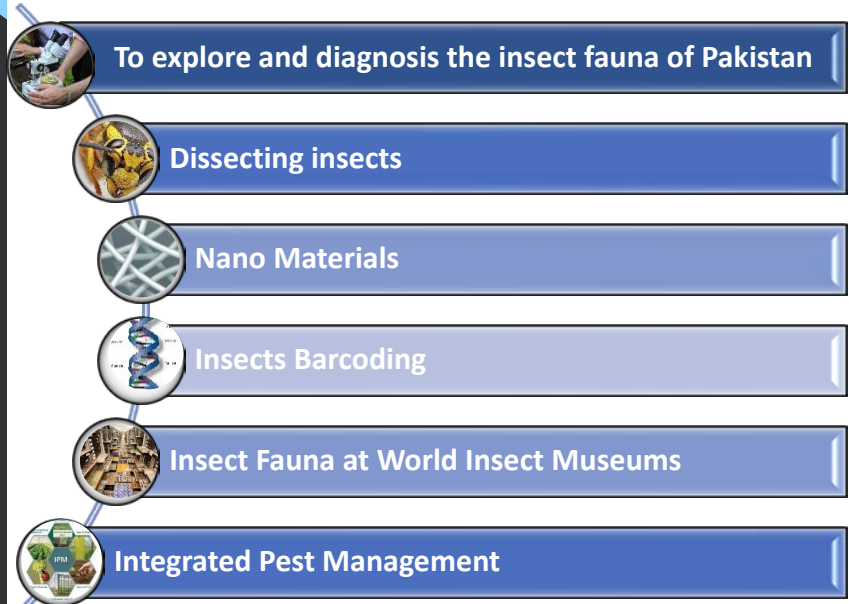

ACHIEVEMENTS

Prior to beginning his government job, Dr. Khatri embarked on his professional career by cultivating betel vine in Thatta in 1996. Despite facing challenges, he persevered in his pursuit of excellence. In 1998, he successfully passed the Sindh Public Service Commission exam, achieving an impressive ranking of number 9 out of 850 candidates. Subsequently, during his PhD studies and after joining SAUT, He also dedicated considerable time and effort to establish the Department of Entomology, with a focus on the welfare of students. His achievements in this regard are noteworthy and demonstrate his commitment to advancing the field of Entomology and supporting the academic and professional growth of students.

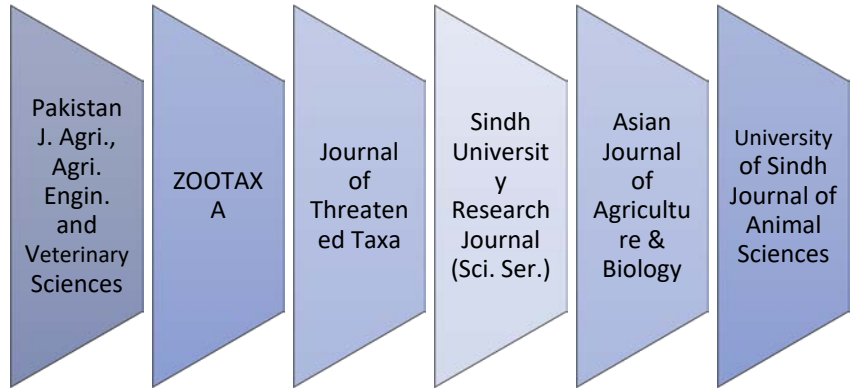

RESEARCH INTERESTS

Dr. Khatri's research primarily centers around diagnosing and studying insects that are associated with crops, with the aim of finding effective solutions. He is also currently involved in ongoing research on nano materials. Notably, he has received specialized training on nano materials from Shinshu University in Japan. In addition to his research, Dr. Khatri has also collaborated with MUET Jamshoro to invent the FlyTrap, a novel solution in pest management. He is actively involved in studying insect fauna of Pakistan, and shares his expertise with students on crop management, providing solutions to growers for effective insect management. Dr. Khatri's multidisciplinary approach to research, innovation, and mentoring reflects his dedication to advancing the field of entomology and contributing to sustainable agricultural practices.

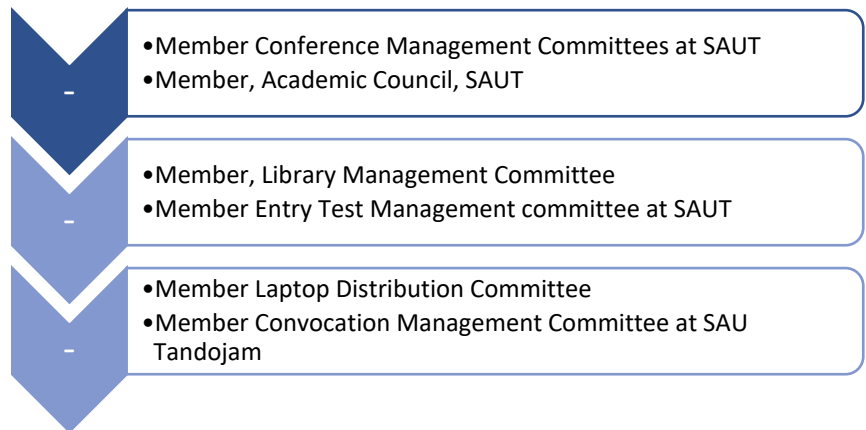

SUBJECT EDITOR / REVIEWER OF JOURNALS

As a result of his extensive involvement in research and active participation in conferences both within and outside of Pakistan, Dr. Khatri has been appointed as a subject editor and reviewer for several prestigious journals. His expertise and contributions to the field of entomology have been recognized by these journals, and he plays an important role in maintaining the quality and integrity of scientific publications. Dr. Khatri's service as a subject editor and reviewer further reflects his commitment to advancing the field of entomology and contributing to the scholarly community through his expertise and knowledge in the field.

MEMBER OF VARIOUS COMMITTEES

In addition to his teaching and research responsibilities, Dr. Khatri has been actively involved in various committees and assignments aimed at promoting the well-being and advancement of the university. His dedication to contributing beyond his academic and research roles is evident through his active participation in committee work and other assignments. Dr. Khatri's commitment to the betterment of the university community and his willingness to contribute in diverse capacities highlight his leadership and service-oriented approach towards academic and institutional development.

FIND ME @

Dr. Khatri has launched websites, YouTube channel, and Facebook page for the Department of Entomology and the Entomological Society of Sindh, promoting knowledge dissemination, communication, and collaboration. His proactive approach in utilizing digital platforms for educational resources and networking exemplifies his dedication to the betterment of the entomological community in Sindh and beyond

PROFESSION

Dr. Imran Khatri is a highly accomplished Professor and Chairman at the Department of Entomology at Sindh Agriculture University Tandojam. With over 20 years of teaching and research experience, Dr. Khatri has made significant contributions to the field of Entomology in Pakistan.

RESEARCH

Dr. Khatri has a diverse research background, with interests ranging from insect identification through morphology, molecular and artificial intelligence, to nanomaterials training and flytrap production. His dedication to research has resulted in the discovery of several species of insects new to science and numerous publications, including 92 research papers with an ISI impact factor of 18, 04 books, and participation in several conferences with published abstracts.

GUIDE

Dr. Khatri has a remarkable record of student supervision, having produced 09 PhD students and 105 MSc students. Additionally, he has been actively involved in administration, serving as an active member of various university committees.

WELFARE

As the founder of the Entomological Society of Sindh, Dr. Khatri has shown a deep commitment to the welfare of students and individuals involved with insects. He is also passionate about insect museums and plays a major role in the identification of insect pests of crops, vegetables, and fruits.

AWARD

Dr. Khatri's accomplishments have not gone unnoticed, as he was awarded the Best University Teachers Award of HEC in 2022. His contributions to the field of Entomology in Pakistan have been significant and will continue to inspire future generations of researchers in the field.
